

CUSTOM SOFTWARE

In an age where contractors are becoming increasingly the standard on industrial work sites, document control is more critical than ever. With many hands requiring access to various critical documents, IDS strives for software solutions that help ease, organize, and maintain this documentation, which ultimately reduces overall cost of maintenance and projects.

IDS Wiring facility, Sherwood Park, AB

ON-SITE FIELD SUPPORT

IDS is a unique venture that is not affiliated with an EPC. Our field team is composed of a unique variety experienced qualified Instrumentation technologists that specialize in utilizing efficient effective solutions.

IDS has a site team that is easily adaptable and can provide efficient coverage during shutdowns and schedule projects.

IDS CAN HELP

- o Create an accurate Instrument Index
- o Photograph and Verify Field Instrument Installations
- o Create, Customize and Populate Data Sheets
- o Associate External Data to SPI (INtools®)
- o Migrate Instrument Wiring Information
- o Align Control System I/O to SPI (INtools®)
- o Create Work flows, Procedures, and Training Packages
- o INtools Administration & Hosting Services
- o Creation of Custom Software
- o CAD Incorporation

Come talk to us today. IDS currently has a number of unique data software and systems solutions with one clear goal in mind, to create a safe and more efficient workplace for the modern industrial and manufacturing sector.

NORTH AMERICA'S INSTRUMENT DATABASE SOLUTIONS PROVIDER

IDS IS HERE TO SUPPORT ALL YOUR INSTRUMENT DATABASE NEEDS

WHO WE ARE

Instrument Database Solutions realizes that instrument database software, such as INtools, require qualified people to utilize it on a daily basis in order to maximize the potential. As a result, IDS was created with the vision of eliminating such complexities from EPCM's and plant owner's daily activities.

In addition to field specific personnel IDS also has an IT division that allows for creation of custom software to improve efficiency in a quick and cost effective manner.

DATA MIGRATION

IDS understands the complexities involved with the incorporation and migration of archived & legacy information into SmartPlant® Instrumentation. IDS has refined a strategic step-by-step data implementation system that optimizes this transition. This system greatly reduces cost for an EPC or direct user, while guaranteeing the overall quality & integrity of the Instrumentation Database.

TRAINING

IDS provides a full compliment of training programs. From on-site training with fully qualified trainer's, to client specific training manuals, IDS training programs are clear and organized to help make the transition to Instrumentation Databases as simple as possible.

IDS training facility. Sherwood Park, AB

HOSTING & ADMINISTRATION

IDS provides hosting, setup, & administration of services for a variety of applications. Our staff & facilities are capable of accommodating the many versions and iterations of SmartPlant® applications such SmartPlant® Instrumentation.

- o Oracle or SQL database implementation & support
- o Administration of current SmartPlant® environment.
- o CITRIX environment for accessibility all over the world, with two factor authentication (Key Fob) support
- o 24/7 coverage & support

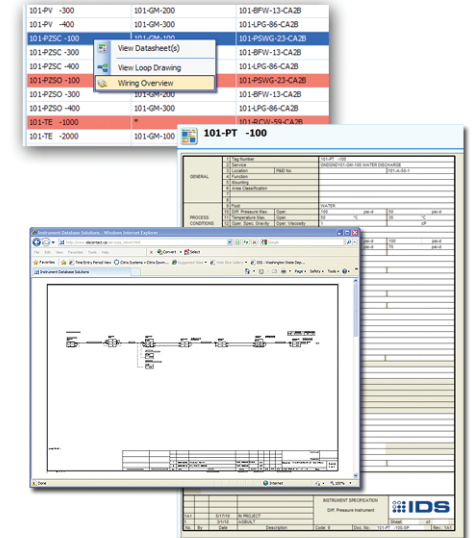

All servers are co-located in a dedicated data centre providing redundant power, cooling and connectivity to maximise availability of applications.

CUSTOMIZED DATA EXTRACTION SOFTWARE

ViewIT provides users the ability to quickly search, filter, and report instrument index information, generate real-time data sheets, and display the latest Enhanced SmartLoop reports¹. Using the intuitive interface and innovative "search & group" feature, locating data is easy and quick. ViewIT also makes finding data convenient with its unlimited licensing format.

Since ViewIT is a standalone software package, it does not require SmartPlant® Foundation or SmartPlant® Instrumentation to function.
